

OMORI STRETCH WRAPPER

Omori North America redefines food packaging with our advanced stretch wrappers. As industry pioneers, we excel in manufacturing cutting-edge stretch wrappers, providing a tight seal for diverse products like produce, fruit, vegetables, beef, poultry, pork, sausage, and plant-based meats.

Our solutions cater to a variety of needs, featuring wide entry units for larger packaging and high-belt options for taller items. Omori Stretch Wrappers are versatile and prioritize critical floor space savings.

Our automatic horizontal stretch wrapper, designed by our founder Shozo Omori, uses a belt-driven system to hold the tray in place while the film is wrapped around the tray to create a center seal. The film is then cut and folded under the lead and back-end to allow the film to tightly adhere to itself.

What to Look for in a Scalable Stretch Wrapper

THROUGHPUT & FLEXIBILITY

- ☐ Can it comfortably meet your target packs per minute for your heaviest SKU?
- ☐ Does performance hold up across chicken, pork, and beef formats?

CHANGEOVER STRATEGY

- ☐ Are most adjustments recipe-based at the HMI?
- ☐ How many tools are needed, and how long do tray/guide changes really take?

FILM EFFICIENCY

- ☐ Can the machine run multiple film widths and gauges?
- ☐ Does it offer fine-tuned control over cut length, overhang, and tension?

PACK QUALITY & CONSISTENCY

- ☐ Are seals tight and repeatable across SKUs?
- ☐ Do packs maintain attractive appearance at top line speeds?
